SENIOR NETWORK / NETDEVOPS ENGINEER

10+ years of networking (ISP/service provider, enterprise, lab) plus Python-based automation and DevOps workflows. Deep Juniper (MX, SRX; JNCIP-SP, attempted JNCIE-SP) and Cisco (ACI, Catalyst, ASR 9k, Nexus, former CCNP-RS). Hands-on Python NetOps (PyATS, Netmiko, NAPALM, Paramiko, REST/JSON/XML/YAML) and Git-based collaboration; lab with Cisco SD-WAN, Palo Alto, F5, and cloud networking fundamentals (AWS/Azure/GCP).

CORE SKILLS & TECHNOLOGIES

- NetDevOps & Automation: Python (Netmiko, NAPALM, Paramiko, PyATS, HTTPX), REST APIs, config generation, data parsing, offline fixtures.
- Networking: BGP, OSPF, MPLS, LDP, VXLAN/EVPN, QoS, VPNs, SNMP, syslog.
- Platforms: Juniper MX/SRX, Cisco ACI/Catalyst/ASR 9k/Nexus, Nokia OLT/BNG, GPON/ONU.
- Tools: Git/GitHub/GitLab/Bitbucket, CI/CD, SolarWinds, SevOne, Splunk, Visio automation.
- Cloud & SDN: Blue Planet MDSO, Cisco SD-WAN (lab), AWS/Azure/GCP fundamentals.

PROFESSIONAL EXPERIENCE

CCS Learning Academy (CCS Global Tech) - Austin, TX (Remote)

Python for Network Engineers Instructor (Freelance) - Sep 2025 - Present

- Designed and taught a 5-day, 40-hour Python + network automation course for Cisco and Juniper environments.
- Built labs for REST APIs (RESTCONF/Junos), Netmiko/NAPALM/HTTPX sessions, data parsing (text/JSON/XML/SNMP/syslog).
- Guided capstone projects from inventory -> API/SNMP collection -> validated multi-vendor change with evidence artifacts; introduced Ansible and Python-Ansible hand-offs.

Insight Global (Google Fiber Lab) - Austin, TX (Remote)

QA Automation Software Engineer (Networking) - Jan 2024 - Oct 2024

- Used PyATS and Python (ixnetwork_restpy, Netmiko, Paramiko, SCPI) to test FTTH networks (Juniper, Nokia, OLT/BNG/ONU, GPON/XGSPON).
- Stood up GitHub workflows with code review, Jira-linked branches, and live demos of automation to stakeholders.

Apex Systems (Amazon) - Austin, TX (Remote)

Network Engineer III - Nov 2022 - Apr 2023

- Automated collection and validation of network/system data into AWS version-control repositories.
- Scripted Linux host and Juniper TOR provisioning in a DevOps-style environment.

Hays (Arm) - Austin, TX

Network Administrator - Jun 2022 - Nov 2022

- Built an internal Cisco ACI lab (rack/stack, GUI configuration), earning 40 Cisco CE credits.
- Monitored global production networks and resolved incidents in a follow-the-sun model.

Hewlett Packard Enterprise - Austin, TX (Remote)

Senior Network Engineer - Jun 2020 - May 2022

- Remediated spanning-tree issues by redesigning management networks to stacked star topologies.
- Supported supercomputer management networks using Git/Bitbucket for config-as-code and peer review.
- Automated configuration generation from Excel using Python and enabled temporary resource sharing between supercomputers.

Spectrum Enterprise - Austin, TX

Network Developer II - Aug 2019 - Jun 2020

- On an Agile DevOps team deploying Blue Planet MDSO for SDN/NFV-based, zero-touch service lifecycle automation.
- Added Cisco ASR 9k automation and Python tools to collect server CPU/memory statistics for recurring outages.

Network Engineer II - Jul 2017 - Aug 2020

- Planned, designed, and deployed network infrastructure; led configuration and troubleshooting of MEF services.
- Implemented Cisco ACS command restrictions and mentored ~20 engineers; improved config quality with JS forms + Git/GitLab.

Charter Communications - Madison, WI

Network Specialist I - May 2015 - Jul 2017

- Supported scalable network automation and high-availability provider-edge networks (MP-BGP, MPLS, QoS, IS-IS, OSPF).
- Built a Python/PHP/JSON API to auto-generate Visio diagrams (.vsdx), cutting a multi-hour task to ~10 minutes.
- Led recovery of a bug-affected core router for critical government networks with zero traffic loss; trained field technicians on RFC2544.

EDUCATION & CERTIFICATIONS

- Assoc. IT, Network Specialist - Madison Area Technical College, 2015
- CCNP Routing & Switching - Exp. Sep 2022
- JNCIP-SP - Exp. Sep 2022 (attempted JNCIE Service Provider)
